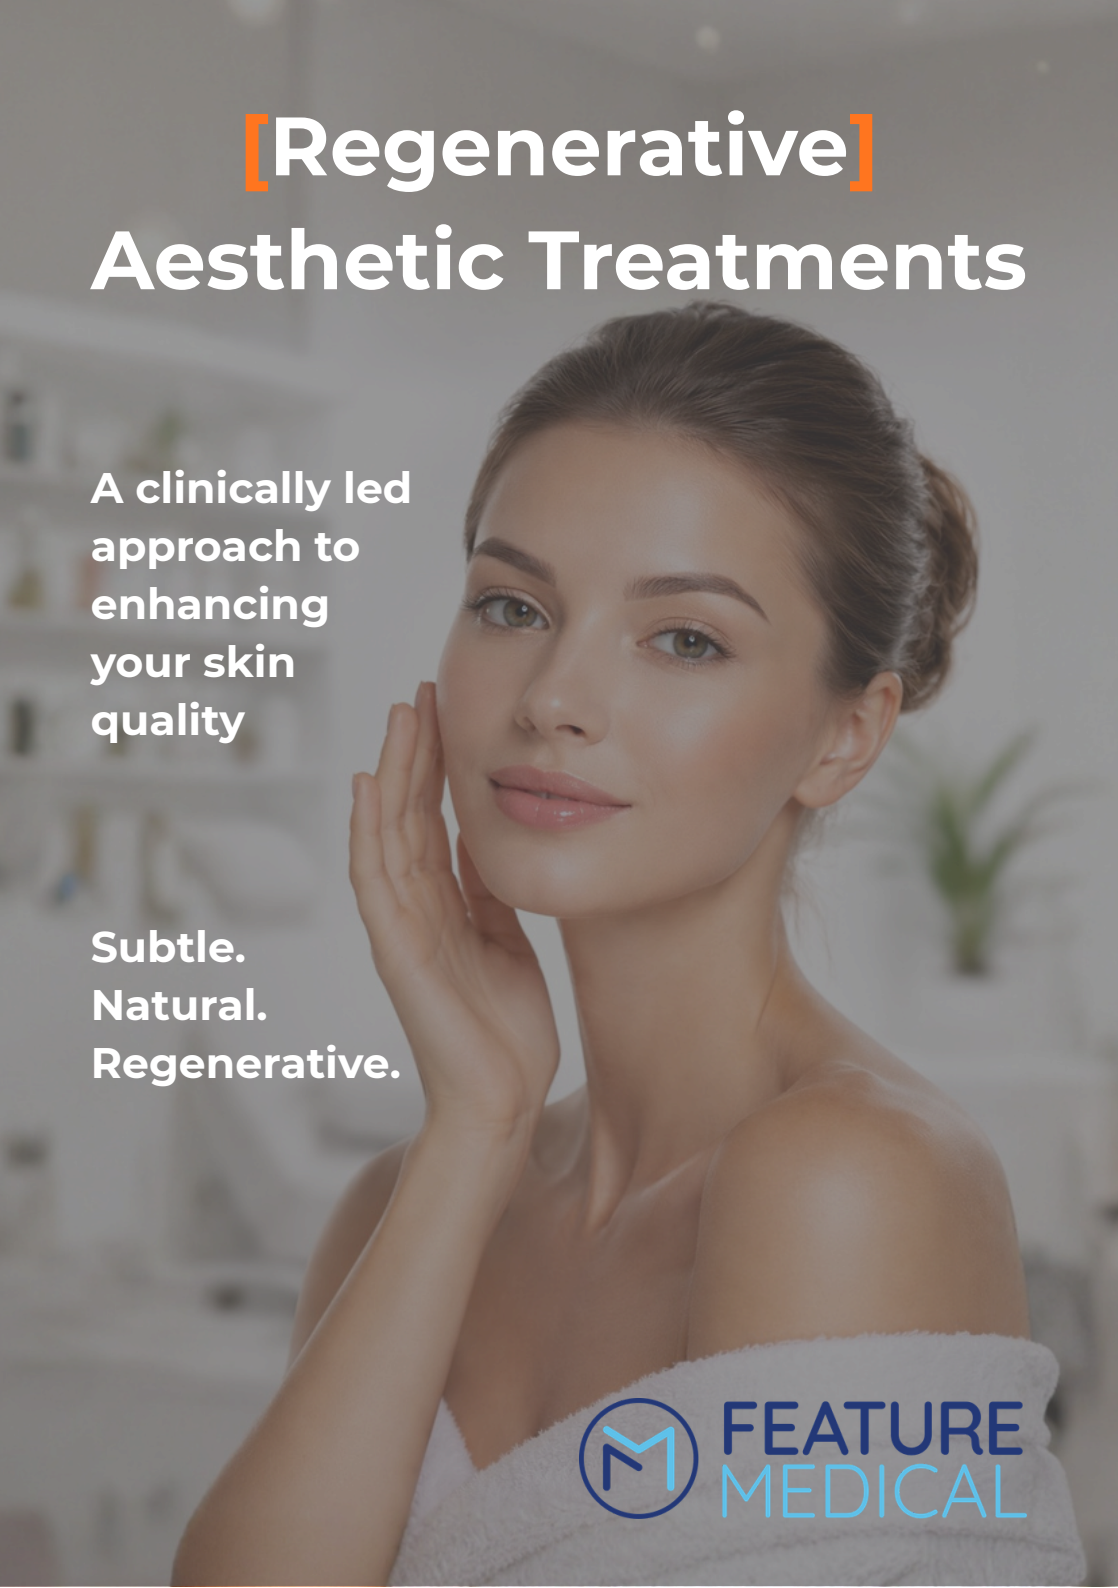
[Regenerative] Aesthetic Treatments



A clinically led approach to enhancing your skin quality

Subtle.
Natural.
Regenerative.

FEATURE MEDICAL

Our [Approach]

Our clinical approach focuses on improving skin quality by supporting the body's natural regenerative processes, rather than relying on artificial interventions such as traditional fillers or muscle-relaxing treatments.

By stimulating collagen production, improving hydration, and enhancing skin health at a cellular level, these treatments deliver subtle, natural-looking results.

This approach is ideal for those seeking a refreshed appearance, prevention of premature ageing, and long-term skin health without altering natural facial expression or structure.

[Personalised] Consultation

We offer a complimentary consultation to understand your skin concerns, goals, and overall approach to treatment. Our focus is on working with your skin's natural regenerative processes, selecting the most appropriate treatments.

Within each treatment category, we use a range of clinically selected products, each suited to different skin types, concerns, and desired outcomes. Following a detailed assessment, we will work with you to develop a tailored treatment plan designed to achieve your results.

Injectable [Treatment] Pathways

- **Bio-stimulation Treatments**
  Cell regeneration and collagen stimulation using polynucleotides

- **Skin Boosters**
  Hydration, skin strengthening and glow using hyaluronic acid and amino acids

- **Bio-remodellers**
  Firmness and hydration without adding volume using hyaluronic acid and amino acids

- **Autologous Regenerative Treatments**
  Skin repair using your body's own growth factors

- **Vitamin and Wellness Injections**
  Get a boost and support wellbeing with vitamins and coenzymes as a standalone option or as part of a broader approach

Bio-Stimulation [Polynucleotide] Treatments

What are they?
Working at cellular level these treatments stimulate skin repair and collagen production. By encouraging fibroblast activity these treatments help restore skin strength, elasticity and overall resilience.

What do the treatments involve?
The technique involves very fine, superficial injections in the areas being treated.

Eyes

Treatments targeting the under-eye area to repair and regenerate skin.

Benefits: reduction in dark circles, improved skin texture, increased hydration, reduction in fine lines and wrinkles.

Sessions: 2-3 sessions, spaced 2-3 weeks apart.

Downtime: minimal - slight swelling or small bumps for 24-48 hours, but for many these disappear within a few hours.

Best for: tired eyes, crepey skin, fine lines, under-eye bags and dark circles.

Face and Neck

Regenerative treatments designed for the face and neck areas.

Benefits: improved elasticity, increased hydration, smoother texture, reduced inflammation, stronger and healthier skin.

Sessions: 2-3 sessions, spaced 3-4 weeks apart.

Downtime: minimal - slight swelling or small bumps for 24-48 hours, but for many these disappear within a few hours.

Best for: skin damage, ageing skin, dullness, loss of elasticity.

Skin [Booster] Treatments

What are they?
Bio-revitalisation booster treatments that hydrate and support collagen production combining hyaluronic acid and amino acids. These treatments repair skin and improve skin quality by providing essential building blocks for collagen and elastin production.

What do the treatments involve?
The technique involves very fine injections into the skin of the areas being treated.

Benefits: overall improvement to skin elasticity, hydration, smoother texture, radiant glow and reduction in fine lines.

Sessions: 2-3 sessions, spaced 2-3 weeks apart.

Downtime: minimal - slight swelling or small bumps for 24-48 hours, but for many these disappear within a few hours.

Best for: maintaining a healthy appearance and dehydrated skin.

[Bio-remodeller] Treatments

What are they?
Skin remodelling to improve firmness, hydration, and elasticity without adding volume by stimulating collagen and elastin production with deep hydrating properties.

What do the treatments involve?
This BAP technique involves injections into specific anatomical points, there are 5 points on each side of the face.

Benefits: firmer skin, improved glow, enhanced skin elasticity, and hydration.

Sessions: 2-3 sessions, spaced 2-3 weeks apart.

Downtime: minimal - slight swelling or redness for up to 24 hours and occasional bruising at the injection points.

Best for: lax, sagging, dull skin in need of rejuvenation.

[Autologous] Treatments
PRP (Platelet Rich Plasma)

What is it?
Platelet-Rich Plasma (PRP) is a regenerative treatment using your body's own growth factors. Platelets are a natural component of blood, essential to the process of tissue repair and regeneration, particularly supporting collagen and elastin production.

It's been used for many years in areas such as sports medicine to support healing and tissue repair, and is now increasingly used in aesthetics to improve skin quality and regeneration.

It can be used as a treatment to help repair damage from acne scarring and also injected into the scalp for hair loss.

What does the treatment involve?
A small blood sample is taken and processed (whilst preparing for the treatment) to isolate platelet-rich plasma (PRP). This is then injected as a series of small injections into the skin around the face and/or neck.

Benefits: stimulation of collagen and elastin production, improved skin tone and texture, enhanced overall skin vitality, and improved appearance of acne scars.
Sessions: 2-3 sessions are recommended, spaced 4 weeks apart.
Downtime: mild – redness and sensitivity for 24–48 hours, occasionally mild bruising.
Best for: skin tone, texture, acne scarring, and overall skin regeneration.

Vitamin & [Wellbeing] Injections

Our range of intramuscular (IM) vitamin and coenzyme injections are designed to support energy, immunity, skin health, and overall wellbeing. Delivered as a quick injection for efficient absorption and higher bioavailability compared to oral supplements.

NAD+ (Cellular Energy and Longevity)
Nicotinamide Adenine Dinucleotide is a vital coenzyme involved in cellular energy production, DNA repair, and metabolic function. Levels naturally decline with age and stress.
Benefits: increased energy, improved focus, cellular repair, reduced fatigue, and support for overall wellbeing.
Frequency: weekly or fortnightly for 4-6 sessions, then maintenance every 4-8 weeks.
Best for: fatigue, brain fog, stress, burnout, and those seeking advanced cellular support.

Vitamin B12 (Energy and Metabolism)
An essential nutrient for red blood cell production, energy levels, and nervous system function.
Benefits: increased energy, reduced fatigue, improved concentration, enhanced mood and metabolism.
Frequency: weekly or fortnightly then maintenance every 4-8 weeks.
Best for: increased energy, reduced fatigue, and brain fog.

Vitamin C (Skin Health and Immunity)
A powerful antioxidant that supports collagen production, immune function, and protection against oxidative stress.
Benefits: brighter skin and skin tone, immune support, and enhanced recovery.
Frequency: weekly or fortnightly then maintenance every 4-8 weeks.
Best for: dull skin, low immunity, fatigue, and overall skin and health optimisation.

Vitamin D (Immunity and Bone Health)
Essential for calcium absorption, immune defence, and overall wellbeing with deficiency common during winter months.
Benefits: improved immunity, stronger bones & muscles, and mood support.
Frequency: every 12 weeks or seasonally.
Best for: low mood, fatigue, reduced immunity and limited sun exposure.

Treatment Costs (per session inc. VAT)

Treatment	Duration	Price
Initial Consultation	Upto 45 minutes	Complimentary
Polynucleotides		
Lumi Eyes Pro	30 minutes	£120
Vitran PN	45 minutes	£160
Skin Boosters		
Jalupro Classic	45 minutes	£160
Jalupro HMW	45 minutes	£160
Skin Bio-remodellers		
Profhilo	45 minutes	£190
Jalupro Super Hydro	45 minutes	£200
Autologous		
PRP (Platelet Rich Plasma)	60 minutes	£140
Vitamin & Coenzyme Injections		
NAD+	15 minutes	£60
Vitamin B12	15 minutes	£25
Vitamin C	15 minutes	£40
Vitamin D	15 minutes	£40

Where other products are recommended as an alternative to those in the treatment groups above, this would be discussed during your consultation along with any difference in price if applicable
